COMPANY PROFILE

We are a research oriented firm and have a modern R&D laboratory with manufacturing facilities of hot & cold set resins/polymers and their composites. We have developed composite materials for doors, panels and doorframes (choghats) which have extensive use in industrial as well as in house-hold applications. It can virtually replace wood and steel in the formation of doors and panels.

To manufacture doors Polymer Composite hard-foam, fiberglass and polymers are cold welded to make a material of outstanding properties and performance. In developed countries these composites have been used for several years for industrial and house-hold applications.

CHARACTERISTICS OF POLYDOORS

- **Excellent dimensional stability**

In dry or wet weather there will be hardly any shrinkage or expansion of the door panels. The inner and outer joints are not visible; they are made using hydraulic system and special resins.

- **Stable to ultraviolet & infrared rays**

The stability of door panels and frames was checked by exposing them to direct sunlight, heat and rain for four years. No change in the colour or any failure in the material was observed, proving that they are very stable.

- **Durability**

These doors are immune to any bacterial growth, fungi, pest and notably to termite attack. They are washable with mild detergents to their original appearance. These characteristics are of lifelong durability.

- **Colour choice**

A variety of colours are available e.g. White, Off-white, Blue, Yellow, Ivory, Pink or any other shade can be produced by our skilled professionals, as per choice of the customer.

- **Silky touch**

The appearance of the final product is smooth, silky and everlasting.

- **Doorframes (choghats)**

We design and fabricate fiberglass doorframes (choghats) of any size with excellent physical properties. We also fix doors with steel-frames, which are already installed during the construction of buildings. Our technicians fix doors on site at nominal charges.

PREMIUM QUALITY COMPOSITE DOORS

Polydoors are made from special composite material which is anti-termite, anti-fungal, anti-corrosion, water and chemical resistant. Essentially, ensuring the quality of polydoors products.

A perfect amalgam of designs, quality and class.

POLYDOORS DOORFRAMES

Polydoors Doorframes are available in different types and sizes. They are anti-corrosion, anti-fungal which make them durable. Water and chemical resistant make them withstand harsh climatic conditions.

Choose the best for your home, Choose Polydoors doorframes.

WALL PANELS

Polydoors wall panels are available in different designs, textures and colors. They are anti-fungal, anti-termite, free from corrosion making them durable and reliable. Water and chemical resistance further solidify their strength.

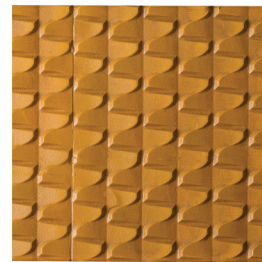

Best for your walls

تعارف

پالیمر کی مصنوعات جدید دور کے ایک کمپوزٹ میٹریل سے بنائی جاتی ہیں۔ کمپوزٹ میٹریل ایک ایسا مرکب ہے، جو فائبر کے ساتھ مل کر کیمیائی طریقہ سے نہایت سخت پتھر کی صورت اختیار کر لیتا ہے۔ جو موسمی اثرات کی وجہ سے عسروں تک خراب نہیں ہوتا۔ یہ تمام کمپوزٹ میٹریل ہم بنیادی طور پر اپنی فیکٹری میں تیار کرتے ہیں۔

پالیمر مصنوعات کی خصوصیات

پالیمر کی مصنوعات کو دھوپ یا بارش میں رکھنے سے ان پر اثر نہیں پڑتا، نہ گھٹتی ہیں، نہ بڑھتی ہیں اور ان کا رنگ کبھی خراب نہیں ہوتا۔ پالیمر کی مصنوعات کو نہ دیمیک لگتی ہے، نہ کسی قسم کا کیڑا، اور ان کی پائیداری تاحیات ہے۔ پالیمر کی مصنوعات کو جب چاہیں صابن یا سرف سے دھویا جاسکتا ہے، دھونے سے پیلے کی طرح نئی اور صاف نظر آنے لگ جاتی ہیں۔ پالیمر کی مصنوعات کی سطح بریشم جیسی ملائم ہے اور ملائمت ہمیشہ قائم رہتی ہے۔ پالیمر کی مصنوعات مختلف سائز اور رنگوں میں دستیاب ہیں۔ پالیمر کی مصنوعات آرڈر پر تیار کی جاتی ہیں
